THE DAILY HERALD. IN FROM DEEP CREEK.

WEDNESDAY, - - DECEMBER 28, 1867 The Operations of the Florence Mining Company.

RICH FROM THE GRASS ROOTS.

Mr. Lemoype Interviewed-Waiting for the Railroad-Clifton's Future -Minnie Moore Closed Down.

That the Deep Creek country is but awaiting the advent of the Salt Loke & Los Angeles Railway, when it will pring into a prominence for which few are prepared, is no longer a matter of doubt. Flattering reports from there have be in published from time to time. and yet the half has not been told. The HERALD, some few weeks since, chronicled the departure for Clifton District. of Mr. M. J. Lemoyne, late of the Bradstreet Mercantile Agency in this city and a stockholder in the Florence Min ing Company, owning extensive and numerous properties in Chilton District. Mr. Lemoyne returned on Saturday morning, and was yesterday seen by a HERALD reporter. To the newspaper man's interrogatories, the gentle man said:

"Oliften is a nicely laid out little own, containing a population of about thirty souls. The climate is no in-fenor to that of this city, and when I left there, on Tuesday last, there was no snow on the ground. So far as I could learn from persons who have resided at Clifton for a number of years past, the snow fall during the winter season is comparatively light with that experienced in the average mining camp for town perched upon the hill minius

"I suppose there is no particular boom in real estate there?" queried the

reporter.
"Well, yes, there is," said Mr. Le-moyne, with a smile, "for I purchased four lots myself."

four lots myself."

"And what, now that you have visited and personally examined the various properties in which you are interested—what have you to say of their present value; what as to the future of the Deep Creek country?"

"Well," was the reply. 'Lieft here, as you well know, with considerable en thusiasm on the subject, born of what I had been told and the assays I had seen, I was accure enthusiastic. I adam.

een. I was acute enthusiastic. I admis but was secreely prepared to find that had not been enthusiastic enough; that the richness of it all far exceeded my most sanguine expectations. The most sanguine expectations. The Florence: Company owns some eighteen mines altogether—in various stages of development. Our deepest shaft is down 150 feet, and we are now running a tunnel to cut this; another shaft is down 58 feet, and the others vary from this depth to 12 or 15 feet. The formation is grantle and we have the word of tion is granite, and we have the word of experts that it is of exactly the same quality as the Granite Mountain of

n'ana. He vou made any shipments?
You hinted, before you left, that you would probably follow the example of the Morning Star people in Kingsley District, and send in a few carloads by way of an experiment."

"No, we shall ship nothing until the religion reaches us our ores are an

reilroad reaches us; our ores are en-tirely to good to throw away; there is no use in paying \$10 a ton freight now when we can ship next fall for \$5. Our when we can ship next fall for \$5. Our idea is to develop four or five of our best properties, and do only assessment work on the remainder. I have brought in with me several hundred pounds of the finest samples of ore that ever came from that section, and I am safe in saying that they will assay from \$10 to \$100 per ton some of them. \$40 to \$190 per ton—some of them, picked specimens of course, will go as high as \$300 or \$400. Our ledges are clearly defined, the ore cropping right to the surface, and the direction of vein can be easily traced. A portion of the specimens were picked right from the grass roots, and the veins widen and Aussaach Baos, did the generous thing by their employees Christmas day. A gift of \$10 to each of the clerks and \$5 to each of the cash boy made the holiday a comfortable one to the big force which the firm has engaged.

Thussbay, Fridat and Saturday next, the vew West Educational Commission will give a series of entertainments in their Tenth Ward schoolhouse, the proceeds of which will be applied to the improving of their school. stone.

"How near to Deep Creek proper, are

"About ten miles from there and from the line of the projected railroad. It is on Deep Creek, of course, that the smelters, concentrators, etc., will be erected, and there is a plentiful water supply. We shall be compelled to naul our ores for about ten miles, and it will be down an easy grade, and can be done at a nominal figure. At Clifton, the water supply is sufficient for all demands for culinary and other pur-

Do your ores carry any gold?" "Yes, running from a trace up as high as \$9 or \$10 per ton; and, mind you. I do not wish to be understood as saving that our mines are the only ones in the section of the country. What I do any is that we have as good properties as can be found there or anywhere What I have said in reference to the Florence Company's properties will apply to all others in that country." 'And as to the future of that coun-

try?" 'I believe that it will develop some of the most important mising camps in the west. All we want is railroad facilities, and we are in a fair way of being supplied with these "

"It has been said by those who claim

to be familiar with the desert stretching between here and Clifton, that it would be almost impossible to build a railroad through there in the summer season. What is your opinion?"

"That such an idea is the veriest bosh. You would be surprised, did you know the country as I do, that anyone could be found witing to make such a statement. It is a good four days' journey from Salt Lake to Clifton, but it will be made, when the Salt Lake

THE MINNIE MOORE CLOSED DOWN. The closing down of the Minnie Moore Mine at Broadford, the heaviest shipper of Wood River, says the Inter-

bottom of it remains to be seen. Some of the men who have been at work in the mine have told us that Superintendent Kinnear informed several of the miners that they could go to work January 1st, if they would work for 83 a day. Rather than do this we under-

January 1st, if they would work for \$3 a day. Rather than do this we understand that about forty leave on to-day strain for Colorado and other points.

Notwithstanding this report, it looks most probable at present that it was not to bring about a reduction of wages that the mine shut down, but because the excessive freights and expenses for supplies, especially the former, take all the profits. If the superintendent gets a reduction in this line, which he says he has promise of, the mine will probably resume work

Mr. Carmichael, one of the owners, shows by figures that a reduction of 50 cents a day in wages would not make ino half the loss which the mine has sustained for the past month. So that measure would not help them out. The employees were paid off restarder. employees were paid off vesterday.

Everybody on Wood River well knows that there is nothing the matter with the mine. There are immense reserves of ore exposed and the shipments have b en very large and regular. There is plenty of profit in it for the owners and regular work for 160 or 200 men if the ex e-sive rates on treight and supplies auld be reduced.

IN RAILWAY CIRCLES.

Baucroft and Bennett off to Denver -Other General Notes.

There are rumors now of still further dissension in the ranks of the employees of the Denver & Rio Grande. On Sanday morning, Mr. Bennett, in response to a message from head quariers, lit out for Denver, and on Monday evening Mr. Baucroft turned his face in the same direction. The necessity for calling them thither is not known but there are strange with the same direction. his face in the same direction. The necessity for calling them thither is not known, but there are strange winks and nudges in railway circles, and low guesses as to the outcome. One claim guesses as to the outcome. One claim is that before the flowers shall bloom in the spring, the D. & R. G. proper will have absorbed the D. & R. G. Western and will then place the system from Denver to Sait Laxe-including the branch line to Ogden-under one management. This of course, means a cutting down of expenses, and a corres ponding decrease in the number of cierks and officials. Other sug-gestions given contain something about the Missouri Pacific, Gould's trip to Europe, etc., etc. But everything else aside, there seems to be good grounds for expecting to hear of some important changes, and that very shortly.

The "Own" train could very properly be echristened "The Morning Star." his report for the quarter enough to Due nere, as it is, at 1.10 a.m., it has been compared with the pound hour, being all the way from one to seven hours late. The train due here at 1.10 this morning was reported at 1.10 this morning was reported. seven hours late. The train due nerc at 1.10 this morning was reported "seven or eight hours" late last even-ing, which would bring it here between 8 and 9 o'clock this morning.

RAILWAY TRAFFIC is not very heavy it stat the present time.

THE SOUTH-BOUND Utah Central train was delayed on Monda between Springville and Payson, by coming into collision with a cow. The locomotive was derailed in the contact.

Forty-nine services had been put in during the quarter, at a total cost of \$12332-a. average of \$1272 each. Referred to the committee on

waterworks.
The special committee to whom had

There is a faction!

Aperion! Anction!

There is a faction of the premises. The road was an important one, and should be held open for the use at the public. The right still remained with the city to condemn the laud and pay Mrs. Carrigan for the amount used.

Mr. Pyper said if he remembered rightly the city had relinquished the right heaves they thought, they had a

right because they thought they had a better way to reach points in that lo-cality; if this was so, and the land must again be condemned, he thought the better route should be selected. He wanted the matter referred to the committee on public grounds.

The Mayor thought the matter should be attended to at once; the road was a very important one, and the only show for the people living in the

snow for the people living in the southern portion of the county was to come over that road.

Mr. Webber moved that the mayor be authorized to take the proper legal steps looking to the condemnation of the land for the purpose required.

Mr. Grant wanted to know why the city had relinquished the ground.

city had relinquished the ground. THE MAYOR-It was because the attorney was a little tender-footed-in little afraid—that was all. As matters now stood, the city had rendered up to Mrs. Carrigan all their rights, save the right to condemn.

After a short discussion, Mr. Web-

ie's motion prevailed, and the council then adjourned until T. esday evening next, at 7.30 o'clook.
